

# FTTA Solution

## LC Hybrid Patchcord

To keep pace with the ever-growing demand for bandwidth in the 5G LTE era, AOPT's FTTA solution provides customers with high-quality broadband capabilities while eliminating the need for building expensive infrastructure. The new FTTA Hybrid Patchcord, combined with copper wire and optical fiber in an unit cable.

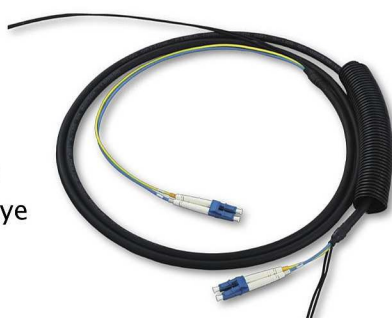

- Three cladding fully protect the fiber
- Cable type for choice (7.0/4.8/3.5mm/customized diameter)
- PVC/LSZH/Armored cable for choice
- PPulling-eye addition enhances protection
- Braid sleeve and pulling-eye addition, more convenient and protective
- Hybrid cable construction, makes more efficiently and high quality operation

Copper wire

LC Duplex Patchcord

FTTA Cable  
with pulling-eye

Armored Cable

FTTA Cable  
with angle boot
